DETAILED ACTION

1. This Office action is in response to Applicant's amendment, filed on 12/13/2004.
2. Claims 1-18 are cancelled and claims 19-24,26-35,37-46 and 48-51 are pending.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 41 is rejected under 35 U.S.C. 101 because it is directed to non-statutory subject matter, specifically, as directed to an abstract idea.

Computer program not claimed as embodied in computer-readable media are descriptive material per se are not statutory because they are neither physical thing nor statutory processes. The claim recites a program for preventing an illegal use of digital contents which do not define any structural and functional interrelationships with a general purpose computer for permitting the claimed functions to be realized. In contrast, a statutory claim would define structural and functional interrelationships between data structures or functional parts and a computer which permit the data functions to be realized. Thus, the claim is rejected as being non-statutory as described above. Therefore, Applicant is advised to include that the "logic encoded on a computer readable memory".

Allowable Subject Matter

5. Claims 19-24, 26-35, 37-40 are allowed.
